

# ORGANISATION CHART

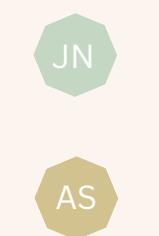

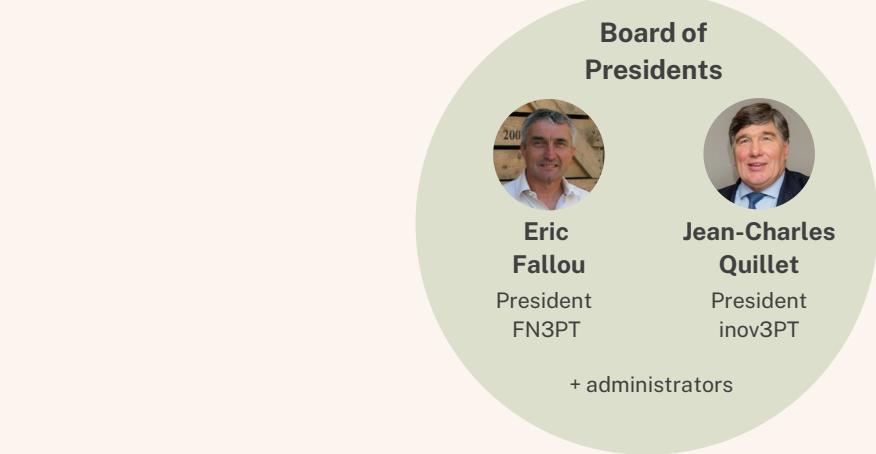

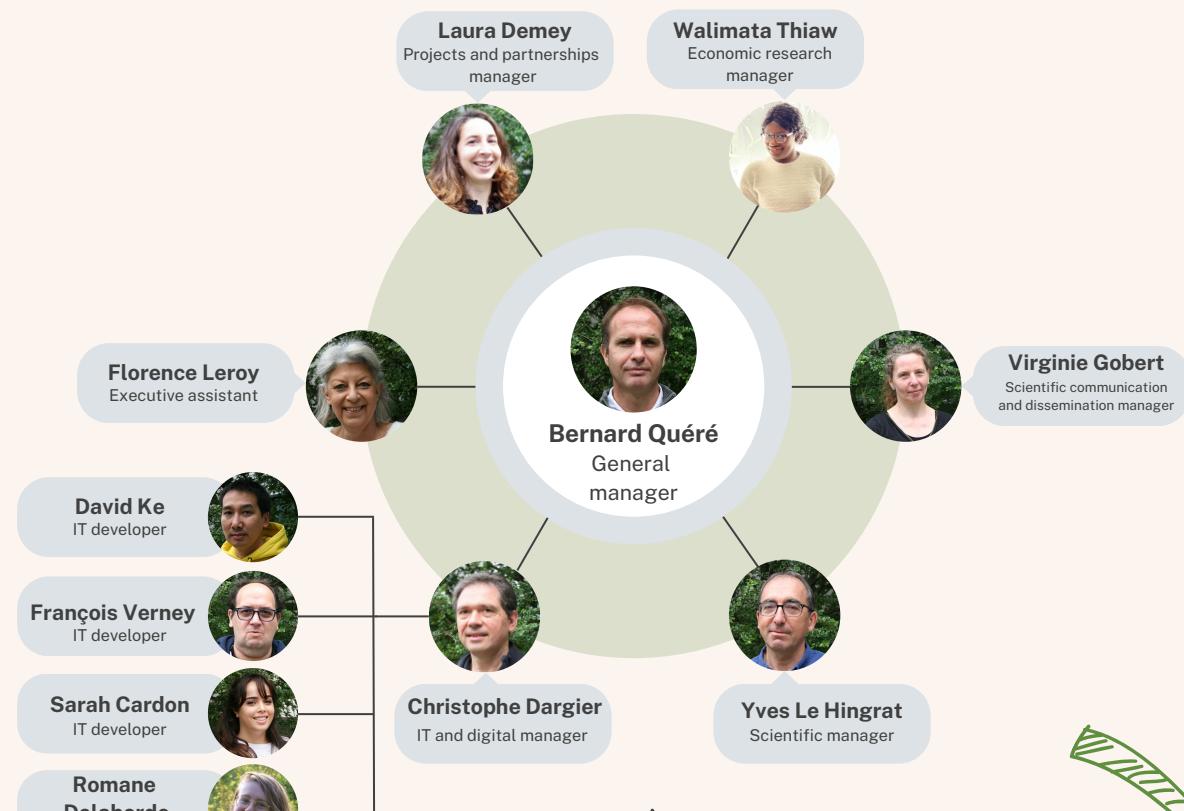

**FN3PT**  
L'ENGAGEMENT  
POUR LE PLANT

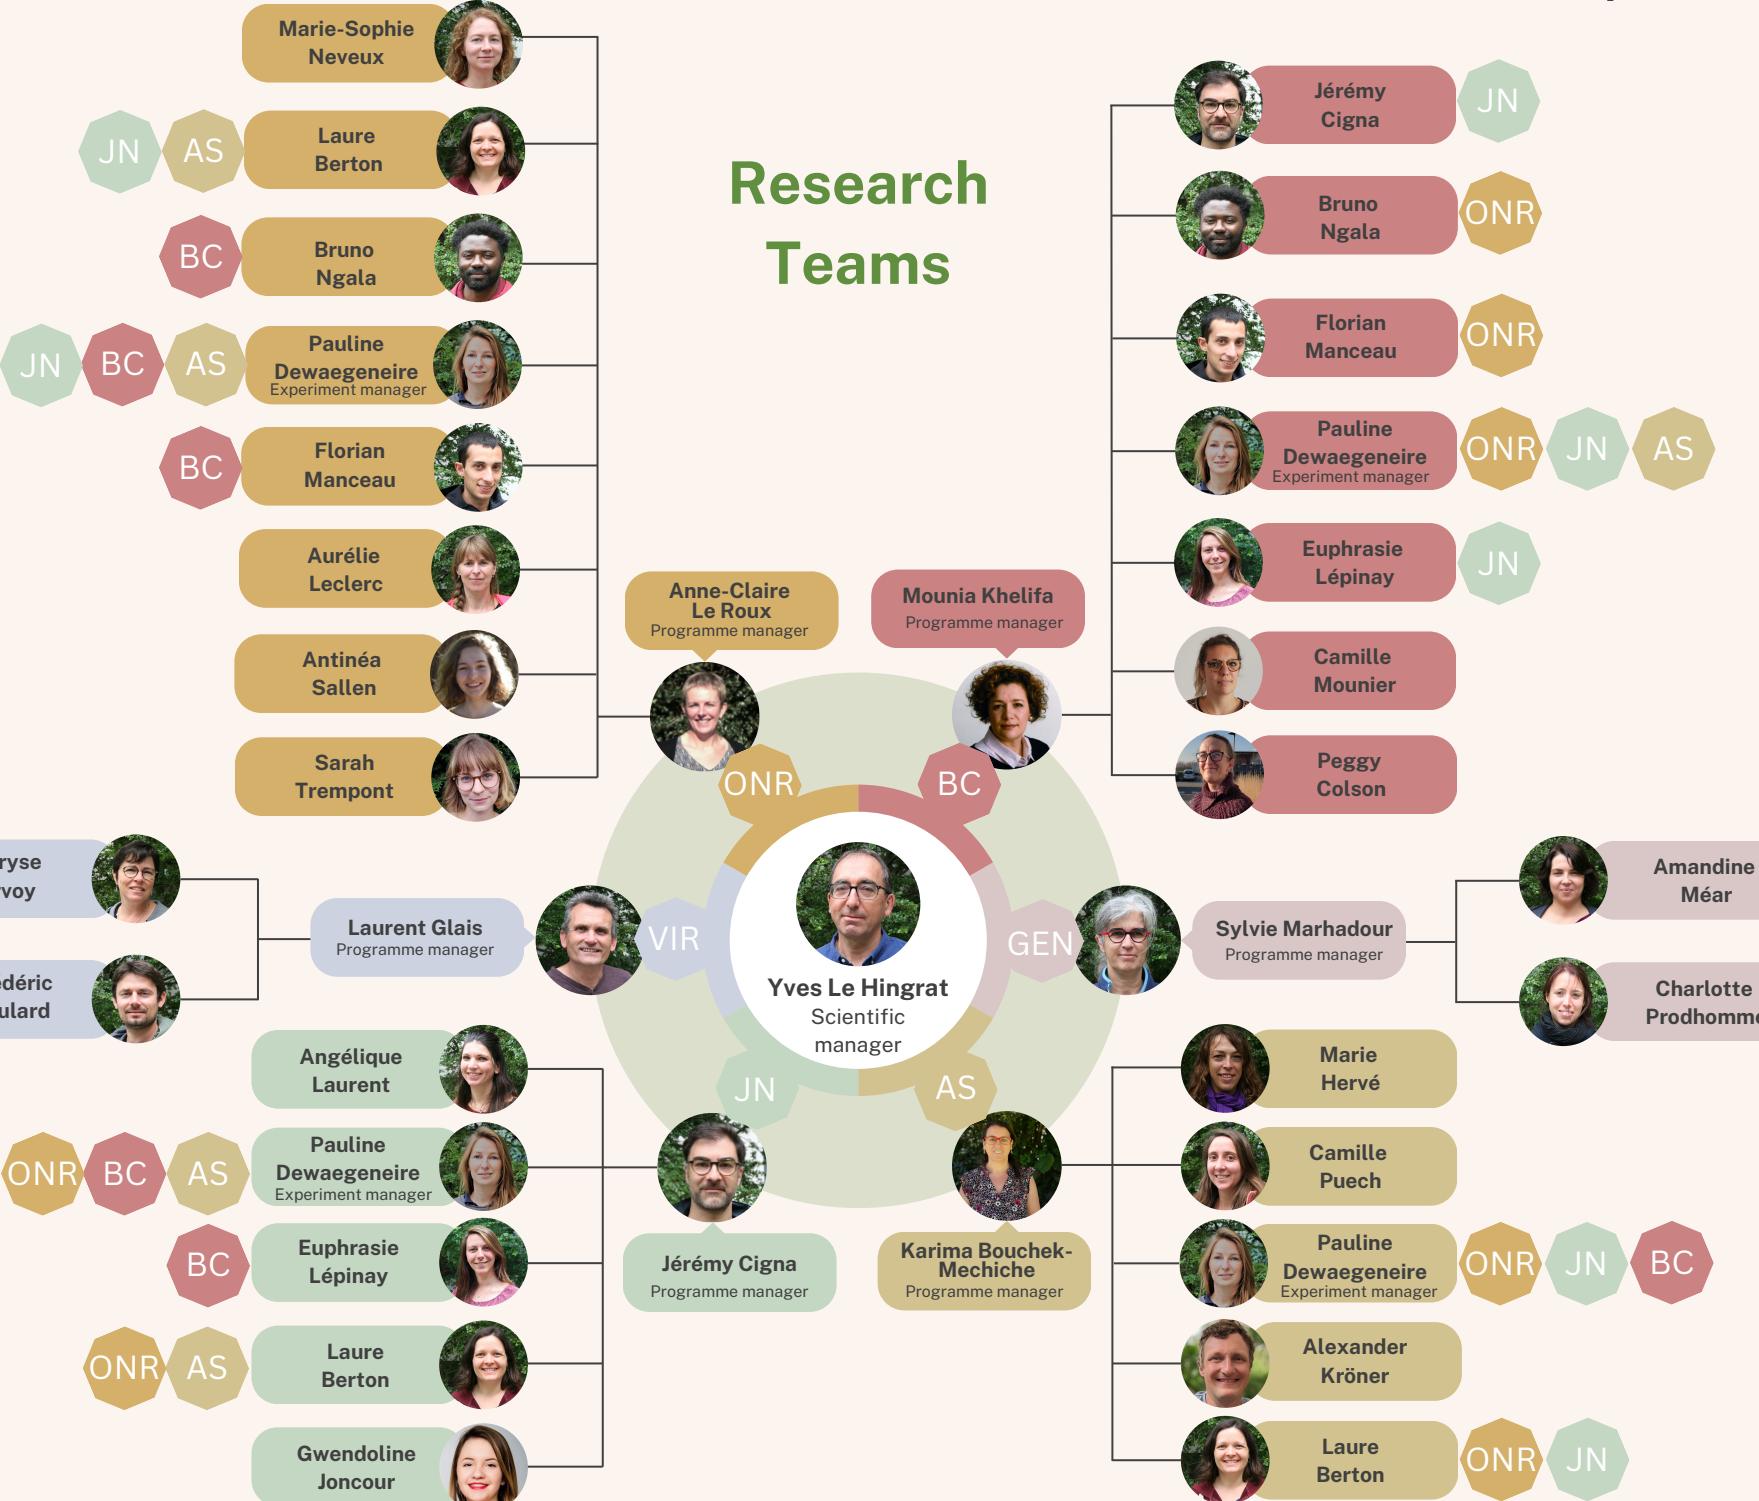

**inov3PT**  
SEED POTATO  
FOR THE FUTURE

April 2024

## Research Teams

## Programmes

Biovigilance on regulated pests and outbreaks :  
detection, epidemiological risks and control methods

Detection, characterisation, epidemiology and  
control of potato virus diseases

Blackleg disease : epidemiovigilance, detection, risk  
factors, sources of resistance and prophylaxis

Surface alterations, conservation diseases and  
agrosystem management

Genetics and techniques in support  
of potato variety selection

Developement of new control  
strategies based on biocontrol
